

15. Community Engagement Policy

TopTung Limited (TopTung or the Company) is committed to the goal of sustainable development in exploration and future mining operations and has adopted a policy of proactive environmental management, safe work practices and community engagement and ensuring compliance with relevant legislative obligations in the course of its exploration and development activities.

Key sustainability initiatives include:

- Minimising our impact on the environment;
- Protecting the health, safety, and wellbeing of our employees and contractors; and
- Ensuring that the communities in which we operate receive real benefit from our activities.

TopTung recognizes that mineral exploration and mining disturbs the natural environment and local communities. It is our responsibility to conduct business in a manner that uses best practices to minimize the effects of our operations on the environment; to provide a safe workplace for all employees contractors and visitors; and to actively promote the sustainability of local communities.

We aim to meet present day requirements without compromising future opportunities.

As a member of the Tenterfield Shire community through its proposed Torrington activities, TopTung recognizes that an open, transparent and constructive approach to community engagement is critical to developing, implementing and maintaining sustainable social and economic initiatives through co-operation and participation so ensuring lasting benefits from our operations.

As the Company invests in exploration and project development it will consult with the host communities, government authorities and other organizations to build longterm partnerships which is believed essential for its business to succeed. TopTung recognises that if successful, a tungsten and topaz mining and mineral processing operation at Torrington will generate economic activity and deliver other local benefits, such as employment and local business opportunities and will work closely with the local community to ensure it participates and benefits as much as possible.

Through encouraging sustainable partnerships with the community stakeholders we aim to develop and implement programmes that will deliver mutual benefits for all involved in the project's development.

TopTung will adhere to world's best environmental practices and ensure all

outcomes of its activities are acceptable to the broader community.
We will publically report on our activities and monitor any feedback to continuously improve our performance.

Adopted by the Board on 7 April 2016

Working with our communities to achieve their future aspirations
